Scenarios

Case	Clients, month 12	Exit monthly recurring revenue	Annualized run rate	Cash collected in the year
Plan	105	$52.2K	$626K	$624K
Half the pace	52	$26.1K	$313K	$312K
Plan with 3% monthly churn	91	$45.3K	$543K	$596K

Clients commit to a 12-month Year-1 term, so churn inside the plan window is limited mostly to non-payment. The 3% case is a stress test, not an expectation.

The funnel at target

Stage	Assumption	One MasterClass	One month (two)
Registered	Target	about 120	about 240
In the room	About two in three attend	80	160
Consultations booked	Four in ten of those in the room	32	64
Clients closed	25% closing ratio	8	16
First-year value at founder prices	$9,011 per client	about $72,000	about $144,000

The plan needs 10 clients a month, about 62% of what the funnel produces at target: 100 people in the room a month (50 per MasterClass) at a 40% booking rate and a 25% closing ratio.

The ask and debt service

The ask is $11,500, one time: $6,500 for marketing and $5,000 for the final software builds. The start date is November 1, 2026, with a 60-day delay before debt service begins on January 15, 2027. The rate and repayment schedule are to be set with counsel; the editable model carries a placeholder (0% over 12 months, about $958 a month) so the effect on cash can be seen.
