LifeCharter
COMMAND SUITE

Investor Summary

A short companion to the Investor Brief · Prepared October 2026 · AmiLynne Carroll

$11,500	105	$52K	No debt
one-time ask	clients in 12 months (plan)	monthly recurring revenue by month 12	income covers payroll and expenses

What it is

The LifeCharter Command Suite is a complete business operating system with executive coaching leading every plan. Clients get the software (strategy, CRM, sales, marketing, finance, projects, content, compliance and an AI assistant) and five live coaching calls a week led by the coach. Its first audience is coaches, consultants and creators doing roughly $70,000 to $1M a year. It is built for any owner-led business, with no upgrade needed to unlock services.

The ask

- **$11,500, one time.** The primary ask is **$6,500 for marketing**, released by session across the first six MasterClasses to measure cost per registrant.
- The secondary ask is **$5,000** for the final software builds that complete the product and its approval on the Apple, Meta and Google platforms.
- Start date November 1, 2026, with a 60-day delay before debt service begins on January 15, 2027.

Where it stands today

- The product is built and live: more than 1,100 commits and 100 working pages. Estimated replacement cost is $100,000 to $195,000.
- **3 paying Starter clients** at founder pricing (one signed before launch) and **5 Pre-Founder beta testers** who give feedback in exchange for no fees until the first $497-a-month charge on April 1, 2027.
- Paid ads began in October 2026, with 2 real registrants from ads in the first 24 hours.

The plan, in numbers

Metric	Plan (founder prices)	Notes
New clients	3, 5, 7, then 10 a month	105 in 12 months; month 1 is October 2026
Monthly recurring revenue, month 12	about $52,000	about $626,000 annualized
Cash collected in the year	about $624,000	about $312,000 at half the pace
Funnel, per MasterClass (two a month)	80 in the room, 4 in 10 book, 25% close	16 clients a month at target; the plan needs 10

Pricing

Plan	Founder price (through Dec 31, 2026)	From January 1, 2027
Starter	$2,497 + $347 a month	$2,997 + $597 a month
Growth	$2,997 + $497 a month	$3,997 + $897 a month
VIP	$4,997 + $997 a month	$7,497 + $1,997 a month

Founder pricing is locked for the life of the contract. Average first-year value rises from about $9,011 to about $14,966 at the January 1 prices. The plan above does not depend on the increase.

Why now

Year end is when owners take stock and decide what next year looks like. Funding on November 1 reaches the November and December MasterClasses, and founder pricing ends on December 31, 2026. A delay pushes out the first measured cost per registrant, the first retention data and the January pricing decision.

What could go wrong, stated plainly

- Paid acquisition cost and conversion at volume are not yet proven. Spend is staged by session.
- Retention past year one is not yet known. Clients commit to a 12-month term.
- Coaching depends on the founder until additional coaches are certified and hired as revenue allows.
- Apple and Meta submissions are pending and Google is in development, which is what the secondary ask closes.

Next steps

A conversation, which can include a live walkthrough of the Suite over Zoom, at your convenience. The Investor Brief, the editable financial model, the security and privacy summary and the replacement-cost assumptions are in the data room.
